ABOUT

Passionate and results-driven Product Development Engineer with a strong background in harnessing cutting-edge technologies to drive innovation in product development. With expertise in Generative AI, Machine Learning, and Natural Language Processing, I thrive in dynamic environments, turning complex challenges into innovative solutions.

SKILLS

Generative AI · LLMs · Deep Learning · Natural Language Processing · Machine Learning · Langchain · LlamaIndex · LLMops · LLM Prompt Engineering · Rasa (NLU & dialogue flow) · Async · Product Development · Critical Thinking · Problem Solving · Effective Communication · Docker · Kubernetes · Amazon Web Services (AWS) · MLflow · Jenkins · ArgoCD · Python · Design Patterns · Debugging · Load Testing · FastAPI · Flask · Kafka · MongoDB · ElasticSearch · Weaviate · Vector Databases · Vibe Coder · Cursor AI · Claude Code · RAG Expertise · Agents Development · Datadog · LLM Observability

WORK EXPERIENCE

Turing • Hyderabad, Telangana, India • 10/2025 – Present

Senior GenAI Engineer

- Architected a production-grade multi-agent GenAI system using LangGraph, orchestrating five specialized agents in a parallel fan-out/fan-in workflow with quality gates and automated retries.
- Developed summary, consolidation, unit-check, data-check, and validation agents to ensure numerical accuracy, formatting compliance, consistency, and professional tone in AI-generated market research reports.
- Strengthened LLM reliability with confidence scoring, multi-provider fallback, exponential backoff (Tenacity), and end-to-end observability via Datadog for token usage, latency, errors, and cost monitoring.
- Leveraged AI-powered development tools like Cursor IDE and Claude Code to accelerate development, improve code quality, and streamline debugging workflows.

ExponentialAI • Hyderabad, Telangana, India • 03/2025 – 09/2025

Senior Machine Learning Engineer

- Developing LLM and agent based POC application for automating healthcare insurance related applications like structured data extraction, question answering etc.
- Built pipelines for structured data extraction from unstructured clinical documents, insurance claims, and policy records, enabling efficient downstream processing.
- Developed summarization workflows to generate concise claim overviews, patient treatment summaries, and policy highlights, improving decision-making for insurers and healthcare providers.
- Collaborated cross-functionally with domain experts to fine-tune custom LLMs and integrate RAG (Retrieval-Augmented Generation) for knowledge-grounded claim insights.

Synopsys • Hyderabad, Telangana, India • 06/2024 – 02/2025

Senior Machine Learning Engineer

- Designed and developed REST API applications leveraging LLMs and machine learning, including a proof-of-concept for integrating Oracle Digital Assistant into an existing platform to enhance employee and manager support for company policies and leave applications.
- Contributed to the development of a job management automation application, enabling real-time job monitoring and insights through interactive dashboards.

Phenom • Hyderabad, Telangana, India • 06/2021 – 06/2024

Machine Learning Engineer II

- Collaborated daily with cross-functional teams, including developers, product managers, and quality engineers, to produce high-quality cloud-based AI/ML solutions.
- Development of Natural Language Understanding (NLU) Algorithms using GAI LLMs (Provider OpenAI).
- Led the implementation of a robust question-answering system, leveraging GAI for improved accuracy and efficiency and also, fine-tuned models to deliver precise responses across various domains and use

cases.

- Pioneered the development of an automated system to generate question-and-answer pairs by parsing and analyzing data from career sites, URLs, and files.
- Managing Continuous Integration (CI) pipeline using Jenkins and Continuous Delivery (CD) pipelines using tools like Spinnaker and ArgoCD.
- Contributed on development of monitoring, tracking and debugging LLM applications product and also agent development playground with open source tools for LLMs based applications.
- Conversion existing code base to complete async version and played a pivotal role in exploring, analysing, optimizing and enhancing existing machine-learning projects and algorithms.

EDUCATION

Bachelor of Technology - Electronics and Communication engineering

Vardhaman college of engineering • GPA: 8.89 • 06/2017 - 07/2021

CERTIFICATIONS

Claude Certified Architect - Foundations - Anthropic

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional - Oracle

Deep Learning Specialization – Coursera

Machine Learning Specialization – Coursera

PUBLICATIONS

Iris recognition based on Gabor and Deep Convolutional Networks

IEEE • 07/2021

Effective Deep Learning approach based on VGG-Mini Architecture for Iris Recognition

Annals of the Romanian Society for Cell Biology • 05/2021
